Subject: RE: Revised Cool Roof draft 15 day language

CC: <u>charles@eley.com</u>, <u>Audrey@energy-solutions.com</u>, <u>balcorn@energy.state.ca.us</u>, <u>ehebert@energy.state.ca.us</u>, <u>mrogers@energy.state.ca.us</u>, <u>vlew@energy.state.ca.us</u>, <u>H Akbari@LBL.gov</u>, <u>M1Bt@pge.com</u>, <u>PWT1@pge.com</u>

>>> "Dick Gillenwater" <GILLY@syntec.carlisle.com> 08/29/03 01:52PM >>> We have reviewed the wording of the "Cool Roof draft 15-day Language" and accept the draft as is. If an exemption must be stated in Section 149 (b)1B of the document, then we are comfortable with the exemption as worded as long as the definition for "rock or gravel" is maintained. That definition confirmed last time stated "rock or gravel" does not include "minerals" that are used on cap sheet, rolled roofing and Mod Bit roof systems. If minerals are made part of the definition for "rock or gravel", than the standard will actually strengthen asphaltic roofing systems position in the reroofing market since the new standard removes some single plies that compete with them and exempts asphalt systems from the Title 24 requirements for the "first reroof" situation.

If you need further clarification on the above comments, please contact me at my email address or you may call me at 800-453-2554 ext 7040.

Dick
